STEP 3 Remove the stock pegs from the OEM mounts by removing the cotter pin and washer from the bottom of the mounting pin. STEP 4

Reconnect the new Comfort Drop Mount and Mini Board to the mount, making sure that the spring is in the proper position. Drop the mounting pin back into position and secure with the OEM washer and included cotter pin. PIC 4 Check to make sure that your peg pivots up freely.

WARNING

FOOTPEGS MUST BE INSTALLED SO THEY WILL FOLD UPWARD IF HIT BY ANY OBJECT. FAILURE TO ADJUST THE FOOTPEGS TO OPERATE IN THIS MANNER COULD RESULT IN SERIOUS INJURY OR DEATH.

DO NOT USE THE REARWARD MOUNTING HOLE IN THE MINI BOARDS. USING THIS POSITION WILL MOVE THE BOARD TOO FAR FORWARD AND MAY ALLOW YOUR FOOT TO BECOME LODGED BETWEEN THE BOARD AND THE SHIFT LEVER. THIS MAY CAUSE LOSS OF CONTROL RESULTING IN SERIOUS INJURY OR DEATH.

STEP 5

To change the position of the Mini Board rearward, remove the socket head cap screw that attaches the Mini Board to the splined adapter. PIC 5 Insert the socket head cap screw into the forward hole on the Mini Board and thread it into the splined adapter. Make sure the splines on the Mini Board are engaged on the splines on the adapter in the desired position and tighten securely.

STEP 6

To change the tip-up or tip-down position of the Mini Boards, loosen the socket head cap screw far enough to allow the splines on the Mini Board and adapter to disengage. Move the Mini Board to the desired position, and making sure the splines on the board and adapter are engaged in that position, tighten the socket head cap screw securely.

NOTE: If the Mini Boards do not seem parallel after tightening in the desired orientation, they can be fine tuned by loosening the two footpeg mount fasteners and rotating the peg mount forward or backward to achieve the desired position.
